## The Harvester-Thresher Savings Investment Plan

Makes It Easy For You to Own a McCormick-Deering Harvester-Thresher

Under This New Plan Every Responsible Grain Grower Can Pay for His McCormick-Deering Out of a Part of the Savings His Combine Will Make

CROP production cost figures compiled by McCormick-Deering Harvester-Thresher users show savings of from 15 to 20 cents a bushel as compared to the binder method of harvesting.

We are so confident that thousands of Canadian grain growers can make proportionate savings with a McCormick-Deering Harvester-Thresher that we have announced the McCORMICK DEERING HARVESTER-THRESHER SAVINGS INVESTMENT PLAN. By taking advantage of this plan you or any responsible grain grower can purchase a combine now and pay practically all the cost out of the savings you will effect during the next three harvests.

Under this plan you get a time-tried and time-tested combine backed by 18 years of field experience. The details of the plan have been given to all McCormick-Deering dealers. Go to the dealer in your town and ask him about it, or write directly to us if you prefer.

## Dominion Day Sports and Picnic

Posters advertising Oyen's second annual sports day under the auspices of the board of trade, on Wednesday, July 1, are out. A splendid program of sports has been arranged which will give everyone an opportunity to participate in the fun. The sports include: base ball, junior ball, soft ball (three diamonds), basket ball, horse-shoes and a golfer's long driving contest, as well as a large and varied program of sports for children. All children un-

## Cappon Farmer Loses Buildings in Fire

Mr. S. H. Shaffer who lives about four miles southwest of Cappon, had the misfortune to lose an eight-horse barn, a cow barn and chicken house, in a fire of unknown origin last Thursday evening. The loss on the buildings is partially covered by insurance but the contents destroyed were not insured. Besides the buildings, over 800 out-sheds, several sets of harness and two pigs were burned. Mr. Shaffer was out after an early supper putting up fencing, when he first noticed the buildings on fire, and all that could be done was to save the other buildings. A granary close by with 60 bushels of chopped feed, caught on fire several times, but by help of neighbors much blaze was extinguished and the building and contents were finally saved. A team of horses had been taken out of the barn and put in pasture about three hours before the fire was first seen. Mr. Shaffer is at a loss to know how the fire started as there is never any smoking in the barn, nor are matches carried in the premises.

## Tennis Tournament Will Be Commenced Saturday, June 7

The Oyen tennis club will hold a tournament commencing Saturday, June 7. There will be three competitions, ladies' singles, men's singles and mixed doubles. The competitions are to be played as drawn otherwise players will default their games. An entry fee of 25 cents a member for each competition played in, must be paid to the secretary, before commencing play in any competition.

## WEIR DEFENDS CHARGES AGAINST HIS DEPARTMENT

Ottawa, Ont.—No answer was required to charges that officials of the Department of Agriculture were incompetent and inefficient. Hon. Robert Weir, Minister of Agriculture, stated in the House of Commons when consideration of the agriculture estimates were resumed.

His own actions since taking over the department were the best answer that could be offered. He thought there had been fewer dismissals in his department than on any former change of government. Out of some 2,500 employees of the department only two or three had been dismissed.

A. F. Tedake (Lib. Humboldt), said the minister should make a statement on an article which appeared in recent papers in the West reflecting on the staff of the department and on the former minister, Hon. W. Motherwell. The House should not be supplied to the department until the charges were disposed of.

"When I spoke in the House the other day," said Mr. Weir, "I don't think it worthwhile to say anything about the article. I have always been careful to speak in the kindest terms of my predecessor in public utterances inside the House. The officials of the department need no defence."

Henry A. Mullins (Cons. Marquette) charged the late government with creating the best answers surrounding the cattle industry. He predicted Mr. Motherwell's successor, Hon. Robert Weir, would "oust" the country \$50,000,000, "chasing" through the country endeavoring to find out if moth eggs are fertile or if barley has whiskers.

Whoever had written the article in question, he did not know, said Hon. W. R. Motherwell, minister of agriculture, but he proposed to defend the officials of the department.

The other day, Mr. Weir, said Hon. Hastings (St. W. E. Tupper) had "mumbled" a statement reflecting upon the accuracy of the department figures. Mr. Motherwell expressed utmost confidence in such returns.

## Natural Gas Waste

Upon Chemistry Rests the Burden of Solution of Serious Problem  
Upon Chemistry Rests the Burden of Solution of Serious Problem  
In Turner Valley, Alberta, remains a problem of extreme seriousness and urgency, and upon chemistry rests the burden of solution. Dr. G. S. Whitney, director of the chemistry division of the National Research Council of Canada, told the opening session here of the 14th annual convention of the Canadian Chemical Association.

At a meeting of the Canadian Institute of Chemistry, subsidiary of the association, Professor Whitney, of the University of Manitoba, was named president. Dr. T. Thorvaldson, University of Saskatchewan, was elected to the council.

## Chinese Want Munitions

Southern Armies Buy Equipment To Fight Nationalist Government Forces

Hong Kong, China.—A contract has been signed between leaders of the southern armies and a firm of munition manufacturers for a million dollars worth of shells, bombs, grenades and rifle ammunition, which to combat Nationalist Government forces. Heavy shipments of arms from Germany and Japan, it was said, have been unloaded at Canton in the last few weeks and the combined Kuomintang and Kwangsi armies have sufficient munitions to hold out for six months.

## Protection Of Copyright

Winnipeg, Man.—Authors who wish complete protection of Canadian copyright for their stories must register them at Ottawa, or indicate the articles that they are "copyright," according to judgment of Mr. Justice Donovan. Otherwise, if a story has no reasonable ground for suspecting that "copyright subsisted in the work," it was entitled to publish it.

## Swedish Flier Promoted

Stockholm, Sweden.—Captain Albin Ahrenberg, Swedish flier who participated in the removal of Augustine Courtauld, British meteorologist, from the Greenland ice plateau, has been promoted to the rank of a captain in the navy in recognition of his feat. His direct rise from a second lieutenant officer was considered an unprecedented distinction in Sweden.

W. N. U. 1922

## Faster Freight Service

C.N.R. Carries Short-Haul Package Freight In Baggage Cars

Winnipeg, Man.—Faster and more frequent delivery of package freight to short-haul points along certain lines of the Canadian National is being effected by Vice-President A. E. Warren to be the object of an experiment which is now in effect in the Winnipeg region. The experiment is the carrying of less-than-carload lots by baggage car of the regular run of passenger trains. The new service went into effect May 22, between Winnipeg, Belmont, Brandon and Virden, and a similar baggage freight service has been established between Saskatoon and Edmonton by way of North Battleford, and between Calgary and Edmonton, by way of Mirror.

## Cattle Shipments To Britain

First Of Several Weekly Shipments From Saskatchewan

Saskatoon, Sask.—One hundred head of Saskatchewan cattle went forward to the British markets recently, 30 of which were taken from a lot of about half a mile of Saskatoon. This is the first of several weekly shipments that will be made after the holiday period of the Livestock Producers' Union. The cattle were taken from the J. H. Langham farm situated one and a half miles out on Avenue "B" North, and were purchased by Mr. Langham under the government flier scheme. They were loaded on the train and averaged between 11 and 12 hundred pounds.

## SOVIET POLICY OF GOVERNMENT MEETS CRITICISM

Ottawa, Ont.—A protest against the action of the Dominion Government in banning imports of coal, pigmeat, furs and other commodities from Russia by order-in-council, was voiced in the House of Commons by the opposition.

Mr. Bourassa found some income in the attitude of the Government toward Russia. Our sense of social order and justice stood "against" the idea of purchasing coal and pigmeat from Russia, but why had the Soviets been invited to attend the London conference of wheat-exporting countries, presided over by Hon. G. Howard Ferguson, Canadian High Commissioner to Great Britain. He presented a motion that "the House regards the growing practice of deciding by order-in-council important matters of public policy, as an encroachment upon the duties and prerogatives of parliament and a violation of the principle of responsible government."

The Russian situation was excellent to use as an example because it has been years since any step in diplomatic and trade relations between Canada and Russia had been taken by order-in-council, he said.

Mr. Bourassa wondered if private interests were not an influence in the banning of Russian products. Senator Webster, he said, had a monopoly of the sale of Welsh coal in this country, and Sir Herbert Holt, with the International Paper Company, monopolized the pulpwood situation.

If Canada was not going to trade with Russia on religious grounds because that country was atheistic, was this country going to stop trading with the United States where capitalism and materialistic beliefs ruled?

When Hon. Robert Gardiner (left), leader of the Progressive Party in the House of Commons, attacked the Beaulieu dam and power project, Premier R. B. Bennett, who had just returned from a private-ownership power project on the St. Lawrence, Senator Wilfrid Laurier McDougall, replied to the assertions of Hon. Robert Gardiner and upheld the Beaulieu dam power project.

On behalf of the various veterans' associations, J. R. Bowler, general secretary of the Canadian Legion, pressed for separate celebrations of "Thanksgiving Day" and "Remembrance Day."

During the committee discussion, some criticism was made of the plan of having two distinct holidays.

## Remembrance Day

Bill Passed To Fix Permanently November 11 As the Date

Ottawa, Ont.—After a prolonged discussion, a senate committee passed the bill to fix permanently the celebration of "Remembrance Day" upon November 11. It was a separate observance of "Thanksgiving Day" and "Armistice Day" fixing the latter upon November 11, and leaving the former to be proclaimed upon the day chosen by the Dominion cabinet. The bill will go back to the senate for final consideration.

During the committee discussion, some criticism was made of the plan of having two distinct holidays.

On behalf of the various veterans' associations, J. R. Bowler, general secretary of the Canadian Legion, pressed for separate celebrations of "Thanksgiving Day" and "Remembrance Day."

## Loss Of Russian Submarine

Craft Goes Down After Explosion With All Hands On Board

London, England.—Russian aeroplanes and warships circled above the spot where Soviet submarine No. 9 of the Baltic fleet sank Friday, May 22, 1921, in a pool of oil.

Although the Soviet Government remains silent on the tragedy, dispatches from Riga, Latvia, said it was understood the craft went down after an explosion presumably with all hands, about 100 miles from Helsinki, Finland.

Moscow dispatches said the submarine failed to rise after making a dive during manoeuvres with other vessels of the fleet.

The number of the crew or the extent of the casualties was unknown.

Russia is believed to maintain a fleet of about eight submarines, 12 destroyers and three battleships in Baltic waters.

Rum Ring Probe

Enlargement Of Investigation Is Urged In Senate

Ottawa, Ont.—Enlargement of the Quebec-St. Pierre-Miquelon rum ring probe to include the Maritime provinces was suggested in the Senate by Senator Hughes. He was informed, he said, the government intended passing an order-in-council within a few days, fixing the powers and scope of the investigation.

Short-circuiting of liquor cargoes from the islands of St. Pierre and Miquelon to isolated spots in Quebec was charged against the rum ring. Senator Hughes declared. The Federal Government investigation was continued, had been mulct out of millions of dollars in excise duties, but he did not believe the investigation of the ring were limited to Quebec province.

Twister Wrecks Train

Tornado Lifts Twelve Steel Caches From Track Near Fargo

Fargo, N.D.—A tornado wrecked the Great Northern passenger train, No. 10, near Fargo, N.D., on the morning of May 22, 1921. One report said the train was blown off the track, and another said it was blown into a ditch. The train was carrying a large number of passengers and freight.

Twelve steel caches comprising the train were turned over on their sides. The engine and tender alone remained on the track. The man killed was believed to have been a section worker. He was pitched through a window as the coaches were blown from the rails.

No Cause For Damage Claim

United States Claims "Tin Alone" Was American-Owned

New York.—A special despatch to the New York Times from Washington says: "The demand of Canada for damages for the sinking by the coast-guard of the mine-running schooner, 'Tin Alone,' 200 miles off the Louisiana coast on March 22, 1920, will be met by the United States with the contention that the vessel was in reality American-owned and that no just cause lies for a damage claim."

Given Honorary Degree

Toronto, Ont.—A governor-general has given an honorary degree to the University of Toronto, when the Earl of Bessborough, Rt. Hon. R. B. Bennett, Prime Minister of Canada, and Hon. George S. Henry, premier of Ontario, received the degree of Doctor of Laws at a special convocation.

Western Boy Joins Navy

Kingston, Ont.—E. C. Mayhew, 16-year-old boy, of Kingston, Ontario, who had been in the Royal Military College who just left the college, has joined the navy. He is the youngest member of the college to do so.

Principals In Beauharnois Discussion

When Hon. Robert Gardiner (left), leader of the Progressive Party in the House of Commons, attacked the Beaulieu dam and power project, Premier R. B. Bennett, who had just returned from a private-ownership power project on the St. Lawrence, Senator Wilfrid Laurier McDougall, replied to the assertions of Hon. Robert Gardiner and upheld the Beaulieu dam power project.

When Hon. Robert Gardiner (left), leader of the Progressive Party in the House of Commons, attacked the Beaulieu dam and power project, Premier R. B. Bennett, who had just returned from a private-ownership power project on the St. Lawrence, Senator Wilfrid Laurier McDougall, replied to the assertions of Hon. Robert Gardiner and upheld the Beaulieu dam power project.

## Thinks Peace Precarious

Author Sure Another War Cannot Be Avoided

In his new study of the political situation abroad, which is entitled "Thunder Over Europe," E. Alexander Powell draws a rather alarming picture of the storm clouds he sees hovering over the present scene. The conflict of interests between Germany and Poland, the rivalries along the Danube where Austria and Hungary are hemmed in by hostile neighbors, the perpetual intrigues in the Balkans and the challenge of Soviet Russia to the capitalist world are the witnesses he summons to emphasize how precarious peace must be in a world which is still restless and heavily armed. But for all his determination to face the realities of the European situation, Mr. Powell is not so gloomy as we might be led to believe. It is true that he considers another war inevitable. With politicians everywhere in control he sees things drifting from bad to worse, friction, hatreds, armaments steadily increasing, "until some incident, perhaps unimportant in itself, will precipitate another conflict." The saving hope in his analysis, however, is this: he is willing to hazard the guess that war will not come before 1940. So often we are told that war is inevitable, the very brink of catastrophe that this respite appears almost like full salvation. It gives us time, nearly ten years in which to remedy the dangerous conditions which Mr. Powell so graphically portrays.

## Justice Sadly Lacking

Immigration Laws Appear To Be Stupid At Times

To refer once more to the stupidity of immigration laws we cite the case of James Squires, aged 55, of Wilmington, Mass. Mr. Squires was born in Newfoundland, but went to United States 37 years ago. When that country went to war with Spain, Mr. Squires volunteered for service, and in the World War he put on the uniform and suffered again. Not far back he went for a visit to his native country, Newfoundland, but when he sought to return to the United States in Wilmington, in which place he had lived for 37 years, he found he could not cross the border. The explanation of the officers at the border is that Mr. Squires had not provided himself with proper papers before leaving home.

So this man of 55 finds that although he has served in the United States Army for two years, and has been a citizen there for 37 years, he can't go home.

No doubt the officers at the border are simply enforcing the law as it has been prepared by men of alleged intelligence, but that element of justice which is supposed to inhere in the signature of a law is sadly lacking in this case—Stratford Beacon-Herald.

## An Organ With a History

Instrument in Liverpool Church Is Link With Napoleonic Wars

The organ in St. Mary's Church, Edge Hill, Liverpool, is a link with the Napoleonic wars. A French frigate was captured and brought into Portsmouth Harbor as a prize. When its cargo was examined the parts of an organ were discovered. These were acquired by Edward Mason, founder of the church of St. Mary, who was popularly known as the "King of Edge Hill." He caused the parts to be assembled and the organ was erected in the church more than 100 years ago. Considerable additions have been made to it since, but it still occupies its original position in the west end.

## Would Develop Salt Industry

The Edmonton Civic Industries Committee is investigating the development of the salt industry in that city. Heavy salt deposits from 100 to 200 feet in thickness are said to exist in the Fort McMurray and other Northern districts.

"He was the life of the party." "No wonder, he was the only one who could talk louder than the radio."

"My wife was in a terrible rage." "Oh, mine chased me into cup-board!" "And then what did you do?" "I locked myself in—and she demanded that I should open the door and come out!" "And did you?" "No fear, I'm master in my own house!"

The Fish: "You work hard?" The Octopus: "But what a lot of mouth I have to feed!" —Buen Humor, Madrid.

W. N. U. 1922

## Would Classify Students

Bright Pupils Should Not Be Held Back In Studies By Slower Ones

What is needed in an educational institution today is a reclassification of pupils into more homogeneous groups so that the bright pupils may advance without hindrance and the backward scholar be given more attention by his professors. This was the belief expressed recently by Chanoine Gustave Jeanjean, professor of applied psychology at the Polytechnic University of Paris, in a lecture in the Montreal Technical School. The confereer declared that tests showing the capacity for work and the capacity for learning of the pupils should be given at regular intervals in an attempt to class the different types of mental activities found in every institution of learning. He said that without some form of reclassification of the pupils the good ones would automatically become lazy waiting for the laggards. They finish their work long before their confereers, he asserted, and the strict enforcement of silence now prevalent in the schools they do nothing but still wait for the laggards to finish.

Any professor or teacher who believes his pupils to be his slaves should hurriedly change his profession, the speaker declared, and the reverse is the case. The adaptation of a teacher who can come down to the level of his pupils is the sure sign of a superior man, the lecturer stated, and of a type which would more easily handle adults when the occasion presented itself.

Prof. Jeanjean has some very definite ideas as to the proper method of handling children in the classroom. "It is immoral," he asserted, "for a young child to follow a two-year course without a break. I refuse to the system of telling them little jokes over and over and I order them to laugh as loud as they can. The speed is that they get some relaxation in this manner and their minds are much more receptive when study time comes around again." He also told his large audience that it was one of his tricks that when he had a child who could not spell properly he would tell him to forget all about spelling for at least three months. In this way, he claimed, the child list all the wrong implications connected with spelling and was in a position to start afresh along the proper channels.

## Feed Tobacco To Sheep

New Recommended For Losses Due To Internal Parasites

Since about 365 years ago, introduced tobacco into England, the use of the weed has grown in popularity. Now sheep in Canada have been introduced to "My Lady Nicotine." A recent bulletin issued by the Canadian Government Department of Agriculture states: "Losses from unwhitenedness due to internal parasites in sheep may be reduced by the feeding of tobacco to the flock." The tobacco is given with salt in the proportion of ten pounds of salt to one of crushed tobacco leaf. The leaf should be dried so that it may be broken up in a size equal to wheat bran. This when mixed with the salt is slightly moistened, forms a cake which the sheep will lick when placed before them in the field or pen. This recommendation is made by Dr. Alison Stevenson, author of the federal bulletin "Common Animal Parasites Injurious To Sheep In Eastern Canada." In which he states that for a flock unwhitened the tobacco is slightly less proportion of tobacco should be used for a week or two at the beginning.

Tobacco has become an important crop in Canada. Last year the total production was \$7,616,917 pounds from 41,304 acres, an increase of about 7,000,000 pounds over 1920. The principal center of tobacco production in Canada is Southwestern Ontario, where 28,616,750 pounds of the total crop of Canada last year was grown. The Ontario acreage was 32,665. Quebec produced 8,021,000 pounds from 8,550 acres, and British Columbia, 79,167 pounds from 189 acres. In 1920 Canada's tobacco production was 15,248,962 pounds from 16,621 acres.

## Couldn't Boss Him

Two men had celebrated the night before and were comparing notes.

"My wife was in a terrible rage," said Jones. "We argued for hours. How did you get on?"

"Oh, mine chased me into cup-board!"

"And then what did you do?"

"I locked myself in—and she demanded that I should open the door and come out!"

"And did you?"

"No fear, I'm master in my own house!"

Oil cloth protectors that roll to one side out of sight when not in use have been invented to guard curtains against rain and dust when windows are open.

## DARING CANADIAN RACERS

The greatest long distance test for motorcycles and motorcycle drivers is the annual road race held in the mountainside lake of Man. The distance is 288 miles and the best drivers in the world annually compete in the grueling dangerous grid, and over a quarter of a million spectators witness the race each year. This year the race will be held in June, and for the first time Canada will be represented in the race. The two Canadians who will compete are shown above. Left—Russell L. Moulds of the Sport Motor Club of Montreal; right, Leslie Marden of the British Empire Motorcycle Club of Toronto.

## Population and Sun Spots

Number of People On Earth Dependent On Solar Cycles

So dependent are human beings, and all other living things, upon sun spots and their cycles of waxing and intensification, that even the number of people on the earth is now thought to vary with their strength or weakness. R. Meldrum Stewart P.R.S.C., recently told the joint session of the Astronomy and Royal Astronomical Society of Canada at the Royal Society of Canada annual meeting in Toronto.

He was reading a paper prepared by Dr. Ralph B. DeLaury and John L. O'Connor, who are conducting an investigation at the Dominion Observatory, Ottawa.

"Insects, birds and animals very in number with the sun spots," he said, "as evident from the records of grasshoppers, grouse and rabbits kept at Rehner, Manitoba, by the Cridde family during the period 1885-1929."

Sun spots are also important factors, thought, to influence the weather on earth.

## Work and Happiness

Only Those Who Keep Busy Are Truly Happy

A father in his will declared that he only only small incomes to his children because he realized very early in life that true happiness came only through work. There are those who will scoff at this dictum. At a conservative estimate there are hundreds of thousands of people in Great Britain who believe that with no work and all play they would find Elysium. Ironically enough, it is only the wise man, or the man who works in the great part of his life, who can understand what happiness means. One moment of freedom snatched from the toil of work is worth all the years of idleness in the bowers of idleness.—Daily Express, London, England.

## A REAL WEDDING ACROSS THE LINE

Because the bride could not enter the United States on account of the quota regulations, and because Ontario would not grant the groom a marriage license and recognize his Mexican divorce, this wedding took place at the international boundary on the Ambassador Bridge, with the bride or groom leaving their respective countries. Reginald A. Crudge of Detroit, and Miss Emily Hunt of Windsor, Ont., are the happy couple, while one who told the knot was —Ann D. Watts.

## Sees Deplorable Situation

Few Canadian Young Men and Women Entering Teaching Profession

Very few Canadian young men and women are entering the teaching profession in Canada. Faces the danger of having her children taught by foreigners in the future, believes Professor F. F. MacDonald, M.A., of Toronto University. The small salaries of teachers were responsible, he said. During a visit in Winnipeg recently the noted professor stressed the fact that "only the smallest portion of the best brains in Canadian Universities are going into the academic profession."

"It is because the money prizes are greater in other professions," he declared. He cited his own case, revealing that in 20 years of teaching "my average salary has not been \$3,000 per year."

The young men in our university," he continued, "across teaching and we are driven to other careers because the profession is in higher repute."

It was a deplorable situation, Prof. MacDonald said, because it was creating an influx of foreign teachers who did not have a Canadian background or viewpoint.

## Kings Pay Their Price

Position Of Power Is Not One To Be Envyed

It has been said that it is no less of an accomplishment to be happy in a palace than to live in a workhouse. It is a happy man, the burden of State and the responsibilities of power are part of the price to be paid for whatever special joys are reserved for Kings and Princes. The same may be said of great wealth, which does not deliver its owner from all ills, nor guarantee the happiness which rich and poor alike are seeking. Whatever pride and pleasure the King of Spain derives from his throne and title are lost with them. But the rest for life that was apparently his own goes with him into a sort of exile, and he is likely to make it intolerable. The same is true of those citizens of no significance who must change the mode of life for one of dependence. What they will make of it depends more on themselves than on the new circumstances that surround them.

## Possibility Of Peace

Chairs In Universities

Resolution Of Miss Agnes MacPhail In House Of Commons

Methods of promoting a knowledge of international affairs and of the work of the League of Nations have been under consideration in the House of Commons committee on International and Industrial relations. The best method of the world, said Dr. MacPhail, is that of the League of Nations. "People who have never heard of a tooth brush paste or mouth wash."

"Are you in favor of women taking part in public affairs?" "It's all right if you really want the affairs public."

## Looking For Bargains

The latest one on the Scotch has it that a certain Sandy McPherson came to this country with matrimonial intentions. A friend met him at the depot with his motor car. Driving to the friend's house, they passed a service station which carried a sign reading: "Four Gals for One Dollar."

Sandy said: "Stop the car!" He read the sign again and said: "No, go on. Four Canadian girls would be much too expensive, I'm afraid."

Up the street a short distance Sandy's alert gaze spotted another sign. "Stop!" he yelled excitedly. His gaze still fastened on the sign he took his purse from his pocket, and jumping from the car, hurried over to the proprietor of the service station.

"I think I'll take her," he said, pointing to the sign, "but could you make me the price twenty-five cents?" The sign read: "TETTY, 28 CENTS."

## Civil Service Superannuation

Attempts are being made by civil service organizations to straighten out a tangle which has developed in connection with civil service superannuation. A recent ruling of the exchequer court of Canada has led to have the effect of declaring that a civil servant has not absolute right to superannuation regardless of the fact that he is compelled to contribute five per cent of his salary to the superannuation fund.

Two Sevens have been presented by the President of France as prizes for French in English schools.

## Prairies Contribute Mineral Wealth

Alkali Lakes Of Western Provinces Holding Great Riches

The alkali lakes of the Prairie Provinces—Manitoba, Saskatchewan and Alberta—have begun to add materially to the mineral production of Western Canada with an increase in 1930 of well over 500 per cent. In the production of sodium sulphate (salt cake). From the deposits of this material in plentiful supply on the prairies, only 5,017 tons were taken in 1929, but last year production jumped to 31,178 tons. This large increase in the output of the anhydrous sodium sulphate was attributable to shipments to the International Nickel Company at Copper Cliff, Ontario, and to increased consumption by the sulphate-pulp mills in Canada.

The pulp mills use salt cake in the International Nickel Company use it when treated with sulphuric acid to make acid sodium sulphate or alkali cake for use in the metallurgical process for the separation of copper and nickel. During 1929, some 90,000 tons of sulphate were used in the pulp industry, and the balance was sold into Canada wholly for use in nickel refining. The natural deposits of acid sodium sulphate in Western Canada will be able to supply the requirements of the copper-nickel industry and of the pulp and paper industry, as well as the International Nickel Company use it when treated with sulphuric acid to make acid sodium sulphate or alkali cake for use in the metallurgical process for the separation of copper and nickel. During 1929, some 90,000 tons of sulphate were used in the pulp industry, and the balance was sold into Canada wholly for use in nickel refining. The natural deposits of acid sodium sulphate in Western Canada will be able to supply the requirements of the copper-nickel industry and of the pulp and paper industry, as well as the International Nickel Company use it when treated with sulphuric acid to make acid sodium sulphate or alkali cake for use in the metallurgical process for the separation of copper and nickel. During 1929, some 90,000 tons of sulphate were used in the pulp industry, and the balance was sold into Canada wholly for use in nickel refining. ## SUNDAY SCHOOL LESSON

JUNE 7

## JESUS CRUCIFIED

Golden Text: "He was wounded for our iniquities; the chastisement of our peace was upon Him; and with His stripes we are healed." Isaiah 53.

Lesson: Luke 23.  
Devotional Reading: Isaiah 53:1-12.

## Explanations and Comments

The Crucifixion, verses 33-34.—We call the knoll where Jesus was crucified Calvary, from the Latin word "calvary," a skull. There He was nailed to a cross, and on either side of Him a malefactor was hung to intensify the ignominy of His crucifixion. The four soldiers who crucified Him, after dividing His garments among them (the headless, the shoes, the outer robe and the tunic), left the possession of the seamless inner robe to the lot of the four soldiers.

John 19:23-24.—The soldiers divided His garments. There (Matthew 27:36), to make sure that He was not rescued. There is a remarkable picture by William Blake, which depicts the three crosses from behind. No form of Christ can be seen. The soldiers are casting the dice for garments, but they have gone behind the cross to do this. Light emanating from the three crosses illumines the three other crosses and the soldiers.

The soldiers are casting the dice for garments, but they have gone behind the cross to do this. Light emanating from the three crosses illumines the three other crosses and the soldiers.

And sitting down, they watched Him as He died. They played with dice. He made His sacrifice. And died upon the cross to rid the world of sin.

He was a gambler, too, His Christ, for He took His life and three times He died for a world redeemed.

Before the western sun went down, crowning that day with crimson crown.

He knew that He had won.—G. A. Studert Kennedy.

"Father, forgive them; for they know not what they do." The beautiful words of the Saviour spoken to His executioners, who had merely obeyed orders, but seemingly also of the Jews who had brought about His crucifixion, and had realized the enormity of their guilt. His prayer exemplifies the love which He had for His enemies, and He did good to them that spitefully used them. Think of the generous mercy of the Saviour who could actually try to find an excuse for them in their very prayer for prayer, but actually try to find something to excuse them in their very prayer for prayer.

There was very little that they could do for them in their very prayer for prayer. There was very little that they could do for them in their very prayer for prayer. There was very little that they could do for them in their very prayer for prayer.

The death, verses 44-46.—For three hours there was darkness and the veil of the temple was rent in two. The rending of the temple veil, a symbol of the rending of the veil of man's sin, and the rending of the veil of man's sin, and the rending of the veil of man's sin.

Through His life and triumphant death, and through the living help of the Spirit, we share in the redeeming love which overcomes all sin and all finagles, freedom, and eternal life.

## Advocates Mixed Marriages

## Union Of White and Yellow Races To Prevent Race War

Intermarriage and marriage between the Japanese and Chinese and white races in British Columbia would not only settle the so-called racial problem, but the resultant race probably would be superior to both the present white and yellow races, in the opinion of Dr. Charles Hill-Tout, noted Vancouver anthropologist, expressed in an interview in Toronto.

In ten generations, if racial and cultural prejudice would be broken down and cross-breeding continued, the characteristics of the new race would be fixed, said Dr. Hill-Tout, who is attending the sessions of the Royal Society of Canada.

Only by intermarriage to the fullest degree could Dr. Hill-Tout see any solution to the possibility of an ultimate race war, with the coloured people against the whites. "I think such a conflict is a possibility," he said, "if we don't check up on our air of superiority in dealing with the Asiatic people and give India self-government. That seems the only way to prevent India from slipping into such a war with any enemy of Europe."

"All this foolish prejudice of race—just as strong on the part of the Japanese—should be broken down," he continued. Denying emphatically common belief, he stated that the races usually retain the virtues of both and the vices of neither. Dr. Hill-Tout said that was simply because of our cultural prejudices.

The resultant product is forced back into the lower of the two races called "inferior." It was that way with the half-breeds of Western Canada, he said, on an account of the race pride of the white were forced back to live with the Indians.

## Russia Keeps It Up

## Country Steadily Pacing Ahead To Reach Its Goal

Russia keeps it up. Her wheat crop is past a billion bushels, away ahead of any other country, and she has now reached her five-year goal in oil production in two and a half years. She is displaced Venezuela as the second largest oil-producing country. The United States is easily first. Elsewhere in this matter is published the statement of the British Secretary for War that Russia's expenditure for war preparation has increased 164 per cent since 1924, and now Russia has ordered 100 tanks from a British firm. Russia's army is steadily becoming more formidable.

## Morning Mast Cost

The cost of the shipyard morning mast at St. Hubert, Que., including land, buildings, equipment and all improvements up to March 31, 1931, was \$1,846,369.16, according to a reply given in the House of Commons by Hon. Donald Rutherford, Minister of National Defence. This sum was exclusive of operating charges.

The oldest set of bells in the United States is a set of four, bearing the date 1682, which hangs in the tower of the parish church of the Cathedral in St. Augustine, Fla.

Fond Mother: "You brute! Look what you've done to my child's bones." The London Opinion.

## WORLD HAPPENINGS BRIEFLY TOLD

Hoping to settle internal troubles in D.C., the government will ask Peter Vergin to hand over the colony of Crestovia to the Sons of Freedom.

Queen Mary was 64 years old on May 26, and felicitations poured in from her a wide circle of relatives, friends and admirers.

Hon. Herbert Marler, Canadian minister to Tokyo, in an interview, urges Canadians to go after Oriental trade.

Regulations governing the shipment of cattle from Canada to Great Britain have been amended to permit the carrying of cattle on open decks to the summer months.

Within the next year on open decks and 30 trade treaties are to be revised, according to a statement made in the House of Commons by Hon. H. H. Stevens.

Export trade in Canadian whisky ran into a tremendous slump during April. The figures were \$100,000 compared with \$2,178,000 for the same month in 1930.

W. O. Duncan, superintendent of the Prince Albert branch of the Soldier Settlement Board for two years, has been transferred to take over the superintendency of the Calgary, Alberta, office.

Gold miners have staked claims in the valleys of Long River and Badger Creek, seven miles northeast of Holmdel, Man. Traces of gold in the valleys about 20 years ago and interest has been revived.

Announcement that the British Dental Association will meet in conjunction with the convention of the Canadian Dental Association in Toronto during July, 1932, was made at the 64th annual meeting of the Ontario Dental Association.

Russian civil aviation authorities announce the intended opening of August 1 of one of the longest passenger and mail airlines in the world, extending more than 10,000 kilometres (roughly 6,000 miles) from Moscow to Irkutsk and Vladivostok.

## Undergo Special Test

Locomotives Of German Railway Examined and Checked Yearly

Once a year the locomotives of a German railway are examined for stability and performance by placing them on a special test stand. Here each engine is operated for many hours as though on an actual run and careful checks are made of its performance. The whirling wheels of the stationary locomotive often revolve to equal an engine speed of eighty miles.

## Alberta Fisheries

Alberta fisheries authorities estimate that more than 2,211,000 pounds of fish were caught by anglers in the province in 1930, or nearly a hundred thousand pounds more than in 1929. Pike made up about half the catch.

Western Livestock Values  
Values of livestock in the Western Provinces are given in the latest estimates as follows: Manitoba, \$52,741,000; Saskatchewan, \$112,846,000; Alberta, \$94,045,000, and British Columbia, \$27,855,000.

The hired man asked little Johnny to pass the salt.

Looking at his mother, the boy hesitated.

"Shall I give him the salt?" he whispered. "Daddy said he wasn't worth it."

A writer says pedestrians must play the game with motorists. They do—hop, skip and jump.

Nearly one-fourth of Poland's 1930 steel production went to Soviet Russia.

W. N. U. 1862

## Disappointed Over Result Of Conference

Leaves Wheat Problem About Where It Was Says London Times

The London Times editorially expressed disappointment that the world grain conference had been forced to adjourn "leaving the problem very much where it was."

The paper said it assumed that prices eventually would be brought back to a remunerative level by growing less wheat but that "this natural method of readjustment is expensive in suffering to both producer and consumer."

The conference was not entirely fruitless, the Times said, "for the existence of the committee it appointed will keep alive the spirit of co-operation and can hardly fail to lead to some restraint of the excessive and unregulated competition which brought the wheat market to its present plight."

The London Telegraph said it was surprised that the conference failed to find an effective remedy for over-production and that the real solution lies in the development of mixed husbandry in countries now growing too much wheat.

Ogopogo Has Vanished  
Again May Be Dead

The Ogopogo that has brought fame to the public by the province of B.C. is dead. No one actually saw him, but the mysterious dweller of Lake Okanagan has not been seen for two years.

Inquiries at all the lake-side towns confirm the belief that he has passed away from old age or other natural causes. It is hoped his carcass will be washed up from the deep so that it may be placed in the national museum.

It is said to have the head of a sheep and a 50-foot body of a sea serpent. He has been used for years with great profit as trade mark for fish principal fruit products of the interior of the province.

## Froth Blowers Disband

Had Envious Record Of Works Of Charity

"Ye Ancient Order of Froth Blowers" is no more. The world famous organization of merry souls has decided to wind itself up voluntarily, according to a notice in the London Gazette.

They leave their great "anthems"—"The More We Are Together," the Merrier We'll Be," and a fine record of charity.

Founded in 1924 by the late Sir Alfred Fripp, eminent surgeon, the "Froth Blowers" in four years raised more than \$500,000 for children's charities. They endowed 50 hospital cots with \$2,500 each, and gave \$70,000 for the development of Boy Scouts and Girl Guide troops in poor areas.

Values of livestock in the Western Provinces are given in the latest estimates as follows: Manitoba, \$52,741,000; Saskatchewan, \$112,846,000; Alberta, \$94,045,000, and British Columbia, \$27,855,000.

The hired man asked little Johnny to pass the salt.

Looking at his mother, the boy hesitated.

"Shall I give him the salt?" he whispered. "Daddy said he wasn't worth it."

A writer says pedestrians must play the game with motorists. They do—hop, skip and jump.

Nearly one-fourth of Poland's 1930 steel production went to Soviet Russia.

## Fast Freight Service

From Vancouver To Montreal In Eight Days

Twenty-four hours has been cut from the running time of the Canadian Pacific Railway fast transcontinental freight service operating from the Pacific to the Atlantic seaboard.

It was announced recently by the transportation department of the company. This will permit a full day's earlier delivery of freight to Montreal.

This train, which formerly took nine days in transit between Vancouver and Montreal, on the new fast schedule makes the coast-to-coast trip in eight, the time between Winnipeg and Montreal being reduced from four to three days.

The improved time rate will not only benefit the middle west, it is explained, but will prove of considerable importance to exporters, who will have 24 hours longer to prepare shipments at the point of origin and still be assured of connection with steamships at Montreal.

New Uses For Wheat  
New uses for surplus wheat and other grains are being made the subject of an exhaustive survey by the National Research Council, it is announced. Other studies are being conducted in the hope of developing processes which will turn waste materials into products of commercial value.

Balsa wood is so buoyant that it can support almost ten times its weight.

Tuberculosis takes its greatest toll between the ages of 15 and 25.

## Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE  
THE ORIGINAL GLASS SUBSTITUTE  
MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

Canadian breeders of poultry and livestock are finding WINDOLITE a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under WINDOLITE. WINDOLITE comes in rolls any length, but 36 inches wide only.

## Here and There

White Leghorn hen "No Irons" 191" from Fort Kells, B.C. laid 127 eggs in 185 days, qualifying her as champion egg layer. The eggs weighed 52 pounds, just ten times her own weight.

In the past fiscal year in Nova Scotia there were 131 companies incorporated with total capitalization of \$5,367,000, an increase of 15 new companies over the previous year.

Rt. Hon. R. B. Bennett, Prime Minister of Canada, and a graduate of Dalhousie University of 1893, was recently presented with a leather-bound scroll conveying recognition and regard of nineteen classmates of the same year.

Thodore H. Kipp, chairman of the Industrial Development Board of Manitoba, reports that since the inception of the Board, Manitoba's industrial payroll has been increased from \$18,000,000 to \$185,000,000.

Miss Margaret Stevenson, of Edmonton, has succeeded to the crown of the next Banff Winter Carnival, following Miss Doris Parkes of Vancouver, last year's Queen. The election was the climax feature of a very successful meet.

W. E. Brittenhead, of Montreal, has been appointed Development Engineer, Department of Development, Canadian Pacific Railway. He succeeds G. M. Hunt who has recently promoted to Assistant Director of Development, with headquarters in Winnipeg.

The 42,500-ton Empress of Britain which is scheduled to sail on her maiden voyage to Quebec, May 29, is the largest vessel built in Great Britain since pre-war days and the largest ship plying between British Empire ports. She will also be the largest vessel ever to make a world cruise.

Total increase in railway taxes during the 38 years from 1890 to 1928 in the United States was from \$1 million to \$21 million dollars, says Dr. Parmelee, Director, Bureau of Railway Economics. This, he asserts, has had an unfavorable effect both on industries and individuals.

The annual University of Montreal tour across Canada which has been a feature of the educational life of the University for the last six years, will be extended to include Alaska and the Yukon Territories for the season of 1931, according to Canadian Pacific Railway announcement recently.

Shipped by Canadian Pacific across Canada, 27 head of purebred Jersey cattle, four pigs, four mountain goats and sheep were swung aboard the freighter Walhemo for New Zealand recently. Captain Ryan, skipper of this new Noah's Ark, wasn't worrying. He said he had handled tigers as well as seamen and stockers in his time.

J. H. Evans, Deputy Minister of Agriculture for Manitoba, states that "in no branch of farm production in Manitoba has the price been so well maintained or the volume of business increased so much as in honey. Manitoba produced well over one-third of the total honey crop in Canada, the quantity of which was unexcelled, and at the present rate of increase Manitoba will be the largest producer in the Dominion next year." 708

Travelling Itinerary, Their Majesties the King and Queen of Siam will not appear at public receptions in Victoria or Vancouver when they arrive with their regal suite aboard the Empress of Japan on route to New York, April 17. The Count-General for Siam announces.

A total of 1,064 moose and 16,872 deer were taken by hunters in the New Brunswick woods during the past hunting season, bringing the total for the past ten years to 12,014 moose and 123,372 deer, according to the report of the Game Warden of the Province.

## About Town and Country

EYES EXAMINED at the hotel Oyen on Saturday, June 3. E. J. Anderson, B.Sc., from Calgary in attendance.

Early closing of stores in Oyen on Wednesdays during the months of June and July will be observed as usual this year, starting June 3. On each Wednesday during the two months stores will close at 1 p.m.

The board of trade committee in charge of the Dominion Day sports, is Mr. Thomas Lees, president, Mr. A. O. MacArthur, secretary, Mr. J. H. Acheson, Mr. M. G. Whitlock, Mr. E. Johnson and Mr. W. D. Morrell.

Mr. H. L. Packard returned to Oyen last Thursday from Youngstown, where he has been on relief duty on the staff of the Bank of Toronto.

Mr. V. E. French, who attended a conference of bank managers in Calgary last week, returned to Oyen Friday morning.

Mr. John Shields was a business visitor in Calgary last week.

Mr. Chas. L. Dunford was a Calgary visitor last week attending the annual Alberta conference of the United Church of Canada. He returned to Oyen Friday morning.

Dr. S. R. McGregor left last Sunday for Drumheller, and is expected back in Oyen, Friday.

Mr. and Mrs. S. A. Miller, Mrs. T. M. Nunn and Mrs. J. B. Lowe motored to Calgary yesterday, the ladies going in to attend Grand Chapter Order of the Eastern Star.

Evelyn Martha Shields entertained seventeen wee kiddies at her home last week on the occasion of her third birthday. Delicious refreshments were served and the afternoon was pleasantly spent by all. Little Evelyn received many pretty gifts. Six o'clock tea was served to a few invited guests of the hostess and great interest was aroused when it was learned that a "real" gypsy would be called in to read the omens. All left pleased with their knowledge of the future.

Mr. Gordon Caswell, who was a week-end visitor in Calgary, returned to Oyen Monday.

## EXCEL NEWS

Mr. and Mrs. Ray C. Anderson Mrs. J. R. Anderson and Mrs. T. O. Stephenson motored to Calgary yesterday to attend Grand Chapter of the Eastern Star.

Dr. B. Gullekson, Miss Zelma Gullekson, Mr. Louis Gullekson and Mr. and Mrs. Harold Gullekson recently motored from Wetaskiwin and spent a week in Excel visiting their brothers Edwin, S. B. and C. R. Gullekson.

Miss Gwyneth Anderson was the week end guest of Miss Ileen Bishop.

Mr. H. MacFarland who has been in Oyen receiving treatment after his recent car accident was able to return to his home the latter part of last week.

A heavy shower which fell in this district Sunday afternoon has freshened things up wonderfully. A good steady rain is needed.

Expert coaching for high school examinations in mathematics, chemistry and languages. Apply to Joseph H. Cooper, Alberta Hotel, Oyen.

A small slough about three miles south of town, now designated the Oyen swimming pool, proved a popular rendezvous last Sunday. Over a score of cars were driven out to the pool and many youngsters enjoyed a dip.

The water appears to be excellent for bathing, the slough being spring fed, and a good grey sand bottom makes it pleasant walking for bathers. The chief drawback is that the water is not deep enough for adults to swim in and an attempt is now being made to scrape out a swimming channel. A subscription is being taken up to defray the cost of doing the work.

Rev. C. M. K. Parsons and Mr. J. B. Lowe, who attended the annual conference of the Anglican Church, held in the City of Regina last week, returned to Oyen today.

Mr. J. C. Dessio motored to Regina last Sunday. He was accompanied by Mrs. J. J. Skirner, who will visit relatives in the city.

Look at your address label!

Rev. and Mrs. H. C. Woods returned to Oyen Monday afternoon. Mr. Woods attended the annual Alberta conference of the United Church of Canada, while in the city. He has accepted the invitation of the Rockyford United Church to occupy the pulpit at that point, and will start in his new charge in July. Rev. E. Kent of Big Valley is coming to the Oyen Pastoral Charge.

Mr. W. S. Marshall and Mrs. James Marshall motored to Calgary yesterday. While in the city Mrs. Marshall will attend Grand Chapter O.E.S.

Oyen and Sibbald ball teams occupied the local diamond last Sunday afternoon playing a friendly game which finished 10-18 in Sibbald's favor.

Joe Cooper arrived in Oyen last Friday to spend the summer vacation with his parents in Oyen. Mrs. Cooper arrived in Oyen from Calgary Monday.

Mr. Wm. Walsh and Mr. Robert Nixon returned to Oyen from Calgary after spending a few days in the city.

Mrs. E. Brinhol and son, who have been the guests of Mr. and Mrs. W. D. Morrell, left last Sunday for Youngstown, where they will visit friends on route to the Peace river country.

Keith Budd of Saskatoon was an Oyen visitor last week.
